**Fiori
design: Joanna Lyle**

Decorativa come una pianta da appartamento, è composta da 13 'fiori' in cristallo, spessore 13 mm, con lampadine da 10W, piantate in una base in cristallo del diametro di 50 cm. Gli steli flessibili sono costituiti da un tubo di plastica trasparente dentro il quale scorrono dei fili di rame che conferiscono rigidità agli stessi. L'altezza totale è 110 cm.
